MANAGEMENT DISCUSSION & ANALYSIS:

Industry Structure and Development

The year 2009 amidst speculation and uncertainty precipitated by the economic downturn which engulfed every nation in the world. However, the developments during the year, demonstrated the resilience and maturity of India, driven by sound macroeconomic fundamentals. For the Indian IT-ITES industry, this downturn signalled the beginning of a new world order and a paradigm shift in the way this industry thinks and operates. While there was certainty that these tumultuous times would pass, the industry viewed this crisis as an opportunity, not only exhibiting resilience but also sustaining its growth.

The year witnessed the emergence of and thrust on its core themes for the next decade – Diversification, Specialisation, Transformation, Innovation and ICT for inclusive growth. We targeted new growth engines beyond our core offerings, invested in developing innovative solutions for our overseas and domestic end-customers, focused on end-to-end capabilities in selected core areas, strengthened internal capabilities by upgrading talent and making knowledge investments. This coupled with our compelling and dynamic value proposition and competitiveness ensured that India remains the leader in the global sourcing landscape.

The sector aggregated revenues of USD 73.1 billion in FY2010, a growth of 5.4 per cent over FY2009, and generated direct employment for 2.3 million people. The industry today has diversified beyond traditional IT into many more service lines, with Indian and MNC service providers collaborating and competing to build the industry.

The domestic market is at an inflection point with the rise of India Inc., growing adoption of IT to achieve greater efficiencies and the Indian government fuelling the demand with various e-Governance initiatives.
