Call us today to learn how Kellton4ERP Chemicals can help you run better than ever before.

Introducing a Better Path to ERP - Kellton4ERP Chemicals

Kellton4ERP is a new approach to quickly implementing SAP, the dominant Enterprise Resource Planning (ERP) software. This 4-step process simplifies and speeds up implementation, reducing cost, complexity, and risk. Utilizing the proven technology of SAP Business All-in-One, Best Practices, and the experienced consultants of Kellton Tech, the process of implementing SAP begin and end in the same fiscal quarter.

Chemical Industry Challenges:

- Are regulatory pressures, quality and traceability issues, etc. slowing your time to market?
- Are you having difficulty analyzing and using your data to improve plant reliability and efficiency?
- Which KPIs will ensure reliability and compliance across your entire operations?
- How to leverage predictive analytics to prevent unplanned shutdowns and lost revenue?
- Is the predicted shortage of skilled labor in the chemical industry keeping you up at night?
- Are you experiencing rapid growth that is stretching your business processes beyond their limits?

Introducing a Better Path to ERP – Kellton4ERP Chemicals

Kellton4ERP Chemicals (Kellton4ERP Chem) leverages the Best Practices in Chemicals with standardized back office functionality coupled with pre-configured Chemical Industry specific solutions.
