

# Introducing a Better Path to ERP - Kellton4ERP™ Manufacturing

Our SAP implementation had an immediate impact within the first week when running MRP identified a requirement for a critical component. This catch ensured no line stoppage or delayed orders.

Call us to learn how Kellton4ERP Manufacturing can help you run better than ever before.

## Introducing a Better Path to ERP – Kellton4ERP Manufacturing

Kellton4ERP is a new approach to quickly implementing SAP, the dominant Enterprise Resource Planning (ERP) software. This 4-step process simplifies and speeds up implementation, reducing cost, complexity, and risk. Utilizing the proven technology of SAP Business All-in-One, Best Practices, and the experienced consultants of Kellton Tech, the process of implementing SAP begin and end in the same fiscal quarter.

### Manufacturing Industry Challenges:

- Are you struggling to keep up with the demands of your customers?
- Are you experiencing rapid growth that is stretching your business processes beyond their limits?
- Are you challenged with the need to reduce supply chain costs while continuing to improve customer service levels?
- Are you struggling to keep abreast of regulations and managing compliance reporting because of a lack of visibility throughout your supply chain?
- Are organizational silos between your supply chain management and production processes hindering your performance?

## Introducing a Better Path to ERP – Kellton4ERP Manufacturing

Kellton4ERP Manufacturing (Kellton4ERP IM&C) leverages the Best Practices in Manufacturing, with standardized back office functionality coupled with pre-configured Manufacturing Industry-specific solutions. With implementation times measured in weeks (not months or years) Kellton4ERP Manufacturing can be up and running in as little as 12 weeks.

### Your Kellton4ERP IM&C implementation includes significant pre-configured best practices right out of the box including:

- Materials management
- Production planning and control
- Sales and distribution
- Logistics, product life-cycle management, and quality management
- Accounting
- Controlling
- Forms and reporting

### Kellton4ERP Manufacturing project documents include:

- Data load programs, tools, and templates
- Detailed transaction instructions and training materials
- Security profiles and roles
- Project plan and other accelerators
